PROJECT(S)

YelpCamp 🐙 | 🌐
Full Stack Development

- Designed and developed a full-stack website that allows users to create, view and review campgrounds using modern web technologies.
- It includes user **authentication** using passport.js middleware and **authorization**, uploading images using cloudinary, building interactive maps using Mapbox GL API.

Ecommerce Platform 🐙
Java Application

- Developed small standalone application using a Java Swing and MySQL. It is an e-commerce prototype that allows users to view,filter the products,as well as add products to the cart. Users also have an option to be as a seller.
- Demonstrated proficiency in Java programming and database management through successful implementation of order tracking functionality.

Movie Recommendation 🐙
Machine Learning, Python

- Build an app where a business owner can create a page that allows users to recommend movies based on existing recommended feature

TECHNICAL SKILLS
